

# EV charging cable - 16A/T2

Ref. 028975

Compatible with 230 V Euro sockets, the 16A/T2 electric vehicle charging cable is ideal for everyday recharging. It can be configured to 10 or 16 A, meaning it can be connected to and used on European electrical installations in complete safety. Made from high-quality materials, it's safe, durable, and resistant to everyday wear and tear.

- Complies with EV charging standards (IEC 61851-1, EN 62752 & EN 62196).
- Memorises the last setting selected
- Can be wall-mounted using a fastening system on the rear panel
- Theoretical charge time from 0 to 100%:

I	P	30 kWh	40 kWh	50 kWh	60 kWh	70 kWh
10 A	2,3 kW	13h	17h	22h	26h	30h
16 A	3.7 k.	8h	11h	13h30	16h15	19h

## TECHNICAL DATA

Reference	028975	
Phase	1~	
Voltage	230 V	
Max. charging current(s)	10 A	16 A
Maximum power	2,3 kW	3.7 k.
	1,40 m + 5 m	
IP classification	IP 66	
Operating temperature	-25°C to + 55°C	
Leakage current	IΔ AC : 30 mA IΔ DC : 6 mA
