

PORTABLE LED LAMP SUNCOLOR 5

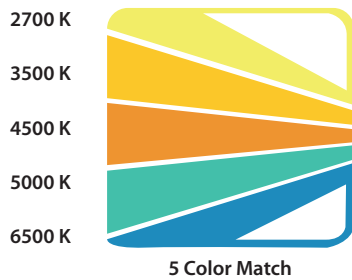

Ref. 060876

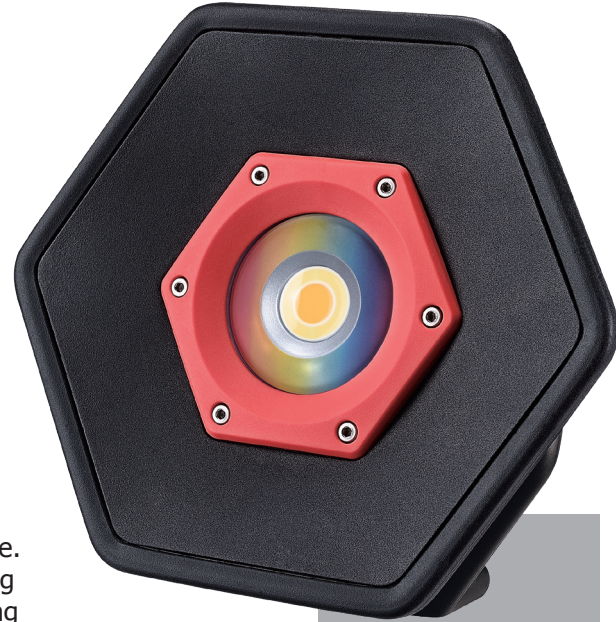

The work lamp SUNCOLOR 5 is specifically designed for evaluating car body tints/colours, using an advanced LED able to recreate natural light. It is also ideal to detect dents and scratches on bodywork.

A LAMP DESIGNED FOR CARBODY WORK

The SUNCOLOR 5 lamp makes it possible to choose between 5 different colours to evaluate car body paint shades by a simple press on the dedicated selection button. 3 different light intensities are also available (500 / 1000 / 2000 lumens).

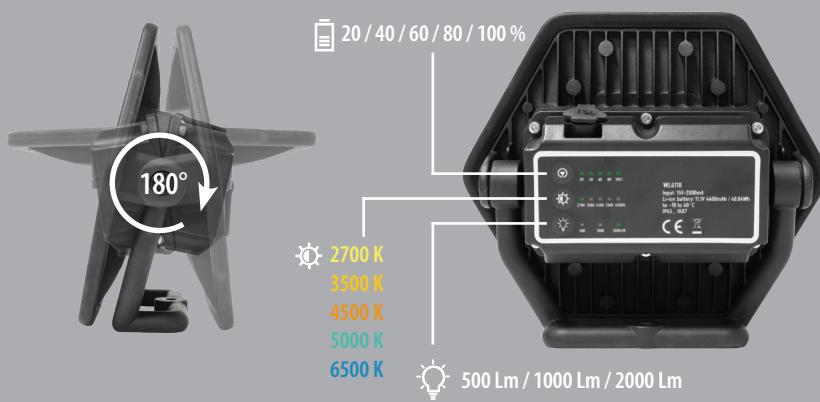

96 CRI

Thanks to its aluminium structure, the SUNCOLOR 5 is light and easy to handle. Its rubber surround reinforces its resistance to shocks or falls. Its 180° pivoting support allows it to be placed on the ground and to precisely adjust the lighting angle on the body.

Also works on mains supply thanks to its 5 m cable.

AND DESIGNED FOR WORKSHOP USE...

The SUNCOLOR 5 is robust and designed to be resistant enough for tough workshop environments. This lamp is rated IK07 and IP65.

The performance of the unit will not be affected by temperature variations between 10 and 40°C. The cordless design makes it a very easy tool to use.
