

Its integrated technology enables a steady weld. Ideal for professional for a regular and intensive work. It's also a light machine (4 kg) easy to carry.

ELECTRODES FROM 1.6 TO 4

- Welds Rutils, Cast-iron and Stainless-steel electrodes.

«SCRATCH» TIG

- For work on thin metal sheets.

ARC QUALITY

- Instantaneous start
- High penetration and arc stability.

POWER CONTROLLED

- Low consumption 16A-230V.
- Tolerant to current fluctuation or arc length.
- Protected and compatible with generator 6Kw (7.5Kva).

INVERTER TECHNOLOGY

HOT START
Additional power to start the arc

ANTISTICKING
Decrease of current to release the electrode

ARC FORCE
Instantaneous increase of current

FEATURES

Supplied in a box set which includes:

- Earth clamp
- Electrode holder
- Strap

- TECHNO 11 TRUE COLOR
- Chipping hammer
- Brush
- Leather welding apron
- Welding gloves
- 50 steel electrodes Ø 2.0 mm
