

Ref. 052093

GYSMETER

Last generation digital display measuring tool, the GYSMETER allows making a quick diagnosis on all types of vehicles by making easy under body measurements (length, symmetry, and cross check).

Its very easy operation allows the measuring to be carried out by a single person.

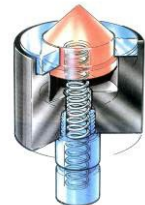

Features

- Quick and easy measurement
- A unique and patented self centring magnet attachment system
- Light weight arm, with easy to read digital display
- Allows making free or comparative measures, without disassembling any part of the vehicle, on lengths from 400 to 2650 mm.
- Powered by 2 x AA 1,5V batteries (not included)
- Can be used on a vehicle in the following situations:

Gysmeter : ref. 052093
