

ROTATING ELEMENT SUPPORT

WORK SUPPORT

TOPARC

Ref. 056725

Universal, modern, easy to use and of a rigid and stable construction, it is made of galvanized steel profiles and tubes. Can be used during grinding, filler application and varnishing. It allows body parts to be fastened using the 750 mm long universal fasteners corresponding to the factory holes of all makes of cars. It is equipped with two 450 mm long suspension pieces for fixing plastic body parts. A toothed wheel allows 360° rotation. Large 52 mm wheels give good mobility.
