

Product compatibility

TITANIUM 400 AC/DC TRI

More information

Compatible processes

MMA / DEGAUSS

How it works

Demagnetisation mode (DEGAUSS): demagnetise your workpiece by adjusting the polarity and setting the current manually with the remote control.

MMA: save time, invert the polarity using this remote control (DCEP < > DCEN) and adjust the current between 50% and 100%.

Example:

MMA: The current set on the product is 150A. The welder makes a root pass in DCEN. Using the remote control, they can adjust the current from 75A to 150A and can change the polarity to DCEP if required for the filling passes.
